

PCI Geomatics Welcomes the German GeoConsultants Group (3G) to the PCI Reseller Network

Richmond Hill, Ontario – October 6, 2010: PCI Geomatics, a world leading developer of geo-imaging software and systems, is happy to announce the appointment of The German GeoConsultants Group (3G) as a local reseller for PCI's Geomatica® and GeoConference® family of products for the Libya and Tunisia regions.

3G joins over forty other PCI Reseller Partners responsible for the distribution of PCI Desktop and Solutions technology across the globe. "Our resellers are the foundation of PCI's global success and we are proud to welcome 3G to the Reseller Network", said Anne Skinner, Global Channel Manager at PCI Geomatics. "3G's experience and industry contacts will help to expand PCI's presence into Libya and Tunisia and ensure that PCI products, training, and support are readily available to this growing market".

"We see PCI as a logical and essential part of our services portfolio" says Stefan Oeldenberger of 3G. "We are involved with many government agencies and private companies in Libya and Tunisia and believe that PCI Geomatics technology will provide great value and important image processing capabilities to our clients".

Geomatica is a broad and flexible suite of geospatial tools assisting in the processing and analyzing of spatial data. With an emphasis on automation and full raster and vector integration, Geomatica is interoperable with other geospatial tools. GeoConference provides an interactive environment and common workspace for users to share data and ideas and to exchange geospatial information in real time. Since everyone is looking at the same geo-referenced map, geospatial intelligence can effectively and easily be integrated into various decision-making processes.
