

PCI Geomatics to Participate as Imagery Silver Sponsor at ESRI User Conference

Richmond Hill, Ontario – July 6, 2010: PCI Geomatics, a world leading developer of geo-imaging software and systems will be exhibiting and speaking at the upcoming ESRI International User Conference in San Diego, July 12-16. The Conference offers hundreds of GIS user presentations, technical workshops and special interest and regional user group meetings.

Peter Hazlett, Product Manager at PCI Geomatics will be speaking to attendees on July 13th about Geolmaging Tools – a new suite of tools allowing users to import accurate imagery from multiple sources in their ArcGIS™ workflows. These highly automated tools for correcting raw satellite imagery were designed specifically for GIS users in mind.

In addition on July 14, Mike Hollis, President of PCI Geomatics USA will present, “Imagery for Successful Operations” highlighting an MGCP project focused on automated processing by using PCI’s Geolmaging Accelerator (GXL).

“PCI Geomatics is delighted to be an Imagery Silver Sponsor at ESRI UC, and we look forward to taking part in accompanying showcases and speaking opportunities at this pinnacle industry event,” said Terry Moloney, Interim President and CEO, PCI Geomatics.

Throughout the conference, PCI Geomatics staff will be available at the Imagery Island and Booth #2437 for on-site daily demonstrations and further discussions. PCI will also be in the Defense Showcase, taking part in the Monterey Cross Defense and Intelligence Interoperability exercise. Furthermore, PCI will be in the Climate Change and Conservation Showcase area.

The ESRI UC will be taking place on July 12 – 16. For more information, please visit www.esri.com/events/user-conference/index.html.

About PCI Geomatics

PCI Geomatics is a world leading developer of software and systems for geo-imaging solutions. Since 1982, we have specialized in remote sensing, digital photogrammetry, spatial analysis, cartographic production, automated production systems, image management and on demand mapping solutions. PCI Geomatics' advanced software systems address a wide variety of industry applications including the environment, agriculture, security and intelligence, aerospace & defense, and satellite receiving stations. We have the expertise and know-how to turn images into useful information.
